Long Term Care Facility Closure and Change of Ownership Process Draft Regulation Presentation

Lauren B. Nelson, JD
Director of Policy and Quality Improvement
Bureau of Health Care Safety and Quality

Sherman Lohnes, JD
Director of the Division of Health Facilities Licensure and Certification
Bureau of Health Care Safety and Quality

Public Health Council
August 12, 2015
Today we will:

• Provide an introduction to Long Term Care Facility (LTCF) closure and change of ownership (transfers)

• Describe current law; and

• Outline the proposed changes to LTCF regulations.
Long term care facilities (LTCF), including nursing homes and rest homes, are part of Massachusetts’ “continuum of care”.

DPH’s priority is the quality and safety of residents at LTCFs. During a closure, DPH’s objective is the safe and orderly transition of residents.

Alongside a national trend towards consolidated ownership, the legislature included an amendment to the FY2015 General Appropriations Act that requires an opportunity for public input as part of the Department’s review process for transfers and closures.

This provides greater transparency of LTCF facility closures or the issuance of a new license, including one issued as a change of ownership (transfer).
Section 275 of Chapter 165 of the Acts of 2014 (FY15 GAA) issues the following mandate:

*The Department of Public Health shall amend the licensure procedure and suitability requirements for long-term care facilities to implement a hearing process that would precede approval of and allow for public input on any application for a license, notice of intent for transfer of ownership or notice of intent to sell or close any skilled nursing facility whether for profit or nonprofit.*
Regulations (105 CMR 153.023) require the following:

- Submission of closure plan to the Department at least 60 days in advance
- Review of closure plan by the Department and partner agencies
- Facility notification to residents, families and staff:
  - After Department approval of plan
  - At least 45 days in advance of closure
- Following notification, closure proceeds with placement of residents
- Facility may not close until all residents have been relocated
Regulations (105 CMR 153.007; 105 CMR 153.022) require the following:

- Submission of notice of intent to acquire at least 90 days in advance;
- Application reviewed by the Department for completeness;
- Hearing conducted in Health Service Area V (HSA V) upon 50-person petition;
  - HSA V is a health care service area consisting of the southeast region of Massachusetts.
- Suitability, including financial capacity, criminal background, and compliance history, determined by the Department, prior to transfer; and
- Notification to the Department subsequent to transfer.
Following significant stakeholder contributions, the Department drafted these proposed regulatory amendments, which are required by Section 275, by:

- Reviewing current regulations;
- Researching notice and hearing processes in Massachusetts and other states; and
- Reviewing and redrafting before arriving at the proposal outlined below.
Any amendments proposed by the Department to the state regulations must comply and be aligned with Medicare/Medicaid requirements, which establish federal guidelines on closure and transfer of certified facilities.

- **CMS closure** requirements include the following:
  - Development of closure plan
  - 60 days’ notice of pending closure to:
    - Residents
    - State Agencies (DPH, MassHealth, Ombudsman)
    - CMS Regional Office
  - Excludes closure due to emergency (fire, flood, hurricane)
  - Facility may not close until all residents have been relocated

- **CMS transfer** requirements include the following:
  - Filing of an application through provider enrollment
  - No public notice/input requirements
The Department’s Proposed Regulations Include:

Public Hearing on Every Closure
- Observation and analysis of stakeholder input demonstrates the need for a public hearing prior to every closure of a LTCF.
- The Department has evaluated existing regulations, identifying areas in the statute to ensure input and transparency

Opportunity for Input on Every Transfer
- There should be a new process for transfers to provide an opportunity for a hearing as well as written public input prior to a sale
- The regulations should define timeframes for the notice of intent to acquire.
## Closure Regulation

The Department will use this regulatory amendment process as an opportunity to correct a conflict between statutory language and the current regulation:

- Sections 73A and B of Chapter 111 of the General Laws exempt from licensure, facilities operated by religious establishments, including the First Church of Christ Scientist and the Roman Catholic Church for members of religious orders.
- 105 CMR 153.025 establishes a process for licensure of only facilities operated by and for the First Church of Christ Scientist and the Roman Catholic Church.
- **Deletion of 105 CMR 153.025, in its entirety, bringing regulations in line with the Massachusetts General Laws.**
• The Department’s priority is to the quality and safety of residents at long term care facilities and during a closure, the Department’s objective is the safe and orderly transition of residents.

• By these proposed amendments, the Department, in collaboration with groups representing residents, facilities and staff, sought to develop a workable model to ensure engagement and communication during closures and transfers.

• Under these proposed amendments, the Department has authority to require a hearing and to require a LTCF to stay open until all of its residents have been safely transitioned to a new setting.

• The Department does not have authority over the sale of real estate and or to require a LTCF to stay open after each resident has been safely transitioned.
• Thank you for the opportunity to present this information today.

• For more information on nursing home closures and changes of ownership, please find the relevant statutory language and the full current regulation here:
